

JD to BJD_TDB Tool

This tool is used to convert one or more timestamps from the JD (UTC) or HJD time scales to BJD_{TDB} .

This plug-in uses the Ohio State University time utilities (<https://astrutils.astronomy.osu.edu/time/>) by default. It can also use a local microservice, similar to the BJD_TDB Converter plug-in. See the BJD_TDB Converter documentation for details.
